DETAILED ACTION

Election/Restrictions

1. Applicant's election of Specie II in Paper No. 10142003 is acknowledged.

Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

The Applicants indicated that claims 54-56 read on the elected specie II, figure 3d, however figure 3d describe the resulting structure from the sequence of steps performed in figures 3a-3c which are described in claims 54 and 55, therefore only claims 54 and 55 read on the elected specie II.

Claim Objections

2. Claim 54 is objected to because of the following informalities: In line 3, "the" should be deleted. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2812

4. Claims 54 and 55 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ogino et al. U.S. Patent 5,213,993 A.

Ogino et al. discloses a method for forming an N+ buried layer comprising the steps of; oxidizing top and bottom surfaces of an N+ device wafer 5; bonding a handle wafer 7 to a bottom oxide layer 6; removing a top oxide layer 6; and thinning said device wafer 5 (see figures 12a-12c).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wada discloses a method of forming a buried layer 33.
